PROFESSIONAL EXPERIENCE

FREELANCE MARKET RESEARCH ANALYST ↯ Spisek, Ljubljana, Slovenia 12/2014-Present
Team of independent experts working remotely, researching and evaluating data, and creating content

to help clients be more successful with their business.

Collect and analyze data on customer demographics, preferences, needs, and buying habits to identify potential markets and factors affecting product demand. Conduct research on consumer opinions and marketing strategies, collaborating with marketing professionals, statisticians, pollsters, and other professionals. Develop and implement procedures for identifying advertising needs. Devise and evaluate methods and procedures for collecting data, such as surveys, opinion polls, or questionnaires, or arrange to obtain existing data. Forecast and track marketing and sales trends, analyzing collected data. Gather data on competitors and analyze their prices, sales, and method of marketing and distribution.

- **Ministry of Agriculture, Forestry and Food project**, April 2015- present, developing content (articles for web, FB posts), developing, editing and managing newsletter & mailing list, marketing analytics, marketing consulting. Key benefits achieved within first six months: Increased number of visits to website by 190%, increased number of FB page likes from 3000 to 18000, growing mailing list by 170%.
- **Montclare projects**, including development of several off-the shelf research products (SaaS 250 and SaaS 1000) and keeping track of SaaS companies (thousands of US and EU based entities).
- **Development project** for SaaS company focused on digital publishing. Introduced concepts of pricing and packaging, as well as accurate KPI models. Developed appropriate software solutions to support the business effectively.
